## Saudi Arabia Food Inspection Team Visits JFM

Last month, JFM received a team of Saudi Arabian Feed and Food Inspectors for the purpose of introducing them to CFIA feed inspection processes at the Canadian feed mill level. The hope of this process is to allow CFIA to approve facilities on their behalf which could streamline export processes. Pictured from Jones with the visiting team are Mike Edwards, Shaun McIntosh and Urias Martin along with several CFIA Inspectors.

## It's Fresh Cow Season!

The Jones Dairy Team reminds Producers to consider **TRANS4M** to assist through the pre and post calving period. TRANS4M assists by influencing feed intakes and body condition while maintaining good health through the transition period. Better transition adds to your peak milk volume which adds to total lactation volume. Call 1-800-265-8735 to learn more.

## Hog Finishing Contract Opportunity

Black Creek Livestock/Family Farm is currently looking for straw-based finishing barns to raise hogs under Certified Humane or Organic Standards. Short-term and long-term contracts are available. Various payment options also available. We are looking for existing facilities as well as producers who are willing to build new facilities. For further information, please contact Larry Bowman 519-502-1131 or Rich VanDonkersgoed 519-496-6439.

## You've Invested! Now let Jones Help Maximize Your Return!

Remember, having all of your new forages and grains tested for quality and toxins will greatly assist us in making the most of your rations and return on your crop investment. Talk to your JFM Rep about testing your feeds today!

*From the Jones Feed Mills Health and Safety Committee:*

### Driving Defensively

This is the season where we need to drive more defensively. With the movement of wildlife, especially at dawn and dusk, it makes our furry friends more difficult to see.

Also as temperatures drop, the chances of ice forming in low lying areas, on bridges and overpasses increases, with a greater risk of loss of traction while driving.

**Please Drive Defensively and be aware of your surroundings!**

### **DAIRY PRODUCERS**

DFO has recently approved a 2% producer saleable-quota increase effective December 1/15.

### **LAST CALL!**

This month marks the last month that the pesticide **Malathion** will be available. Call the mill to order.
