**Jones Sponsored Event*

Hardi Farms Open House Draws Large Crowds!

Last month, Hardi Farms, owned by Nick and Tania Dietrich and Family of the Newton area, hosted an Open House featuring their new Lely robotic milking system and free-stall dairy barn. Jones Feed Mills, along with Avonbank Ag Solutions and other supplier-vendors sponsored the day-long event which saw over 400 visitors come out to see the new, ultra-modern facility. This well laid-out barn allows for a stress free environment for the cows as milking and feeding both become options for all cows to determine by need and desire. Jones Feed Mills is proud to be the feed supplier to Hardi Farms and thank Nick, Tania and Dianne Dietrich for all of their hard work in the preparation of this great event!

BLUELINE – Relief on a Hot Summer Day!

The heat of summer can challenge dairy producers with heat stressed animals, decreased feed intake, compromised components, and reproductive issues; all have lasting negative impacts on a farm's bottom line. Jones Feed Mills has found a solution for the dog days of summer in "BLUELINE", a product originally designed to improve reproductive function in cattle during the hot summer months of the southern US. Seeing its effects this summer in a dairy goat herd that he works with, Dairy Sales Consultant, Mike Mathieson noted that Does on one side of a barn that were fed BlueLine, were "calm and cool", while the Doelings across the alley (not fed BlueLine), were panting in the heat! Ross Gerber, another member of

the Jones Dairy Team, says, "It's a product that Dairy Producers request by name in the spring to have added to their diets because the benefits to their cows are still visible in their minds from the previous summer." Talk to your Jones Dairy Sales Consultant about BLUELINE, and get the jump on next year's production today! Submitted by Holly McGill, Nutrition Assistant, Jones Feed Mills

REMEMBER to properly outfit all of your farm equipment for safe road travel during harvest this summer and fall!

Beef Producers!

When calves and protein prices are at a premium, every dollar counts! Use the Jones **STRESSFIGHTER** program this fall to get your calves the start they need. Talk to a member of the Jones Beef Team about feeding and transitioning your calves.

We Know Beef!

When EVERY DROP of MILK Counts!

To date, 2015 has been a year of extreme cold, challenging hay seasons and high humidity periods, all on top of a heightened demand for milk. To help you maximize your milk production this fall, be sure to discuss with your JFM Dairy Rep the opportunities of using JONES WSC-MR Milk Replacer and *Jefo Dairy Fat™. Each of these products allow you to determine value through their use and therefore their contribution to your profit. *Ask your Rep about new pricing on Jefo Fat for the fall!
